Front cover image: Fulani herders of Benin harvest the leaves of African mahogany (*Khaya senegalensis*) to feed their cattle. To sustainably manage the resource, herders prune most of the branches, but spare a patch at the top, called *sopoodu*. The patch of hair left at the top of Fulani children's heads is also known as *sopoodu*. To learn more, visit Orou Gaoue and Tamara Ticktin's article on Fulani ethnobotanical knowledge on p. 256.
